- 5 What AI apps etc are we using and how can they help?

1 What is AI?

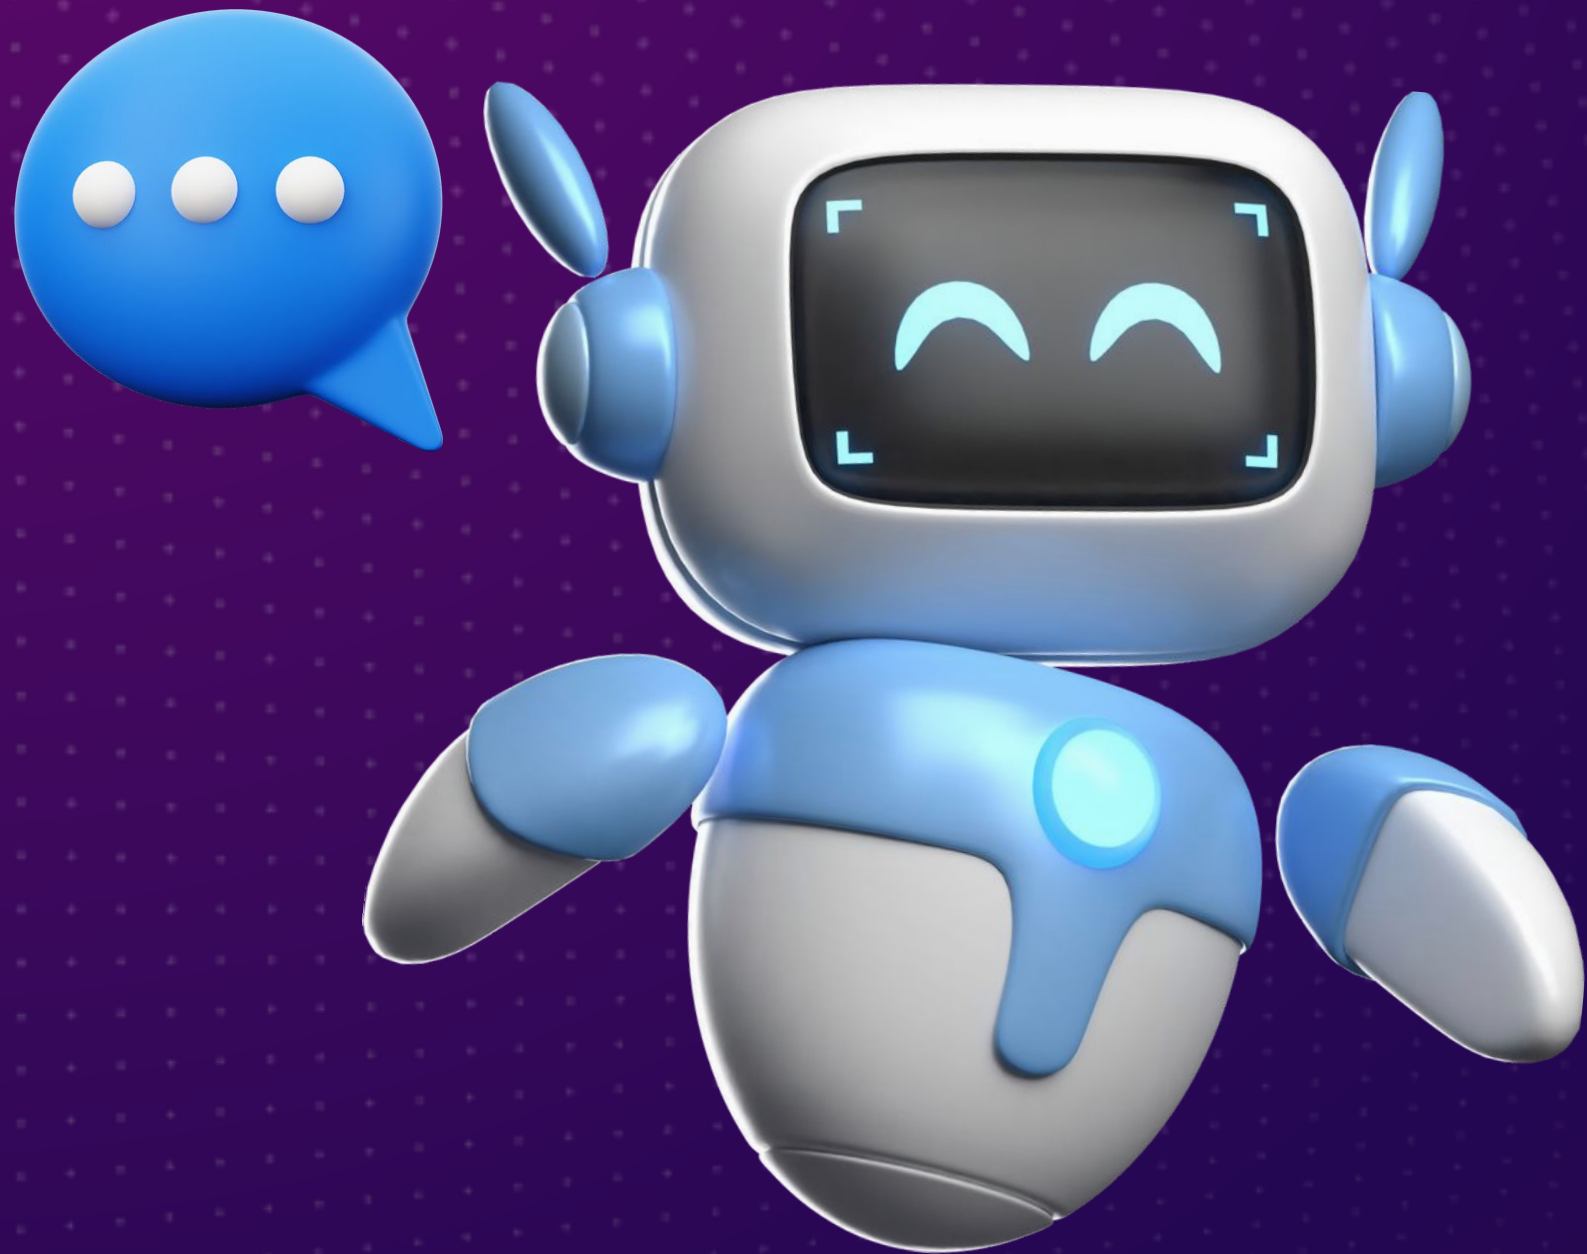

In its simplest form Artificial Intelligence (AI) refers to the simulation of human intelligence by machines, allowing them to perform tasks that typically require human cognitive functions.

2

Student Case Studies-What do we typically do?

*Talk on your tables
about this you have 3
minutes*

Learner 1 - Male Romanian student.
Apathetic. U-Grade student.

Learner 2 - 2 Female white british
students. Suffer from anxiety. Low self
esteem. 1-2 Grade Students

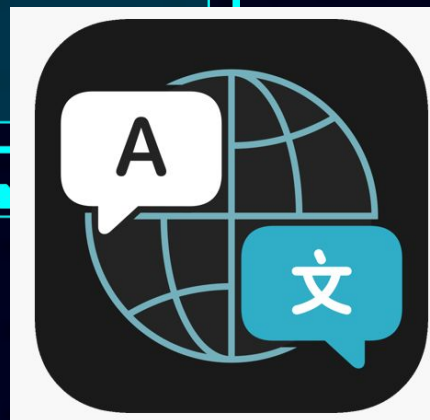

Learner 3 - Black British male. Interested
but lacks essay writing and debate skills.
Grade 3-4 student.

3 How did i use AI to help these students?

enhanced writing skills

AI tools can identify and correct grammar and style errors, helping students produce more polished written work.

enhanced speaking skills

AI tools can recognise speech and provide guidance on pronunciation, aiding students in developing better speaking skills.

4

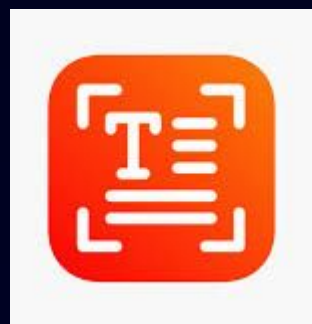

How else can we use AI in Citizenship?

Debate an AI

Have a live debate between the students and an AI (e.g. ChatGPT)

Fast Image to Text App

This app has been BRILLANT from a teaching viewpoint in creating worksheets from textbooks. BUT it is also useful for the Dyslexic students!

Padlet

I use it with my Cultural Council to have us collectively collaborating in organising the annual culture day. This could also be used for other ACTIVE Citizenship Campaign

Other useful apps you could try

Canva

Quizlet

Study Smarter

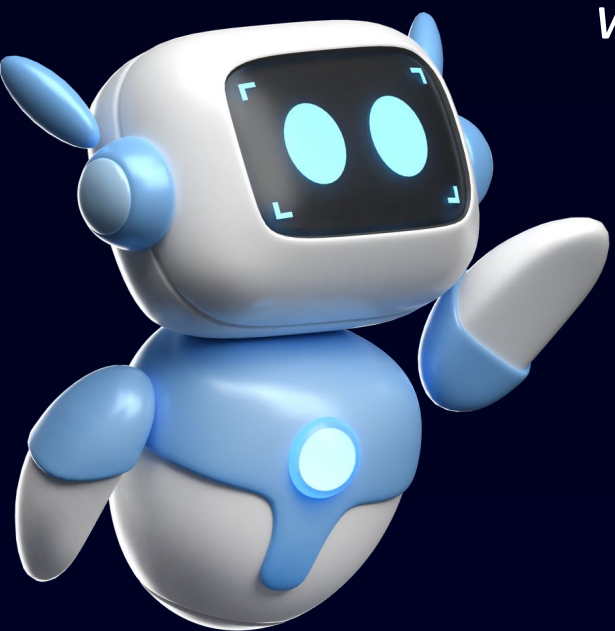

SketchNote

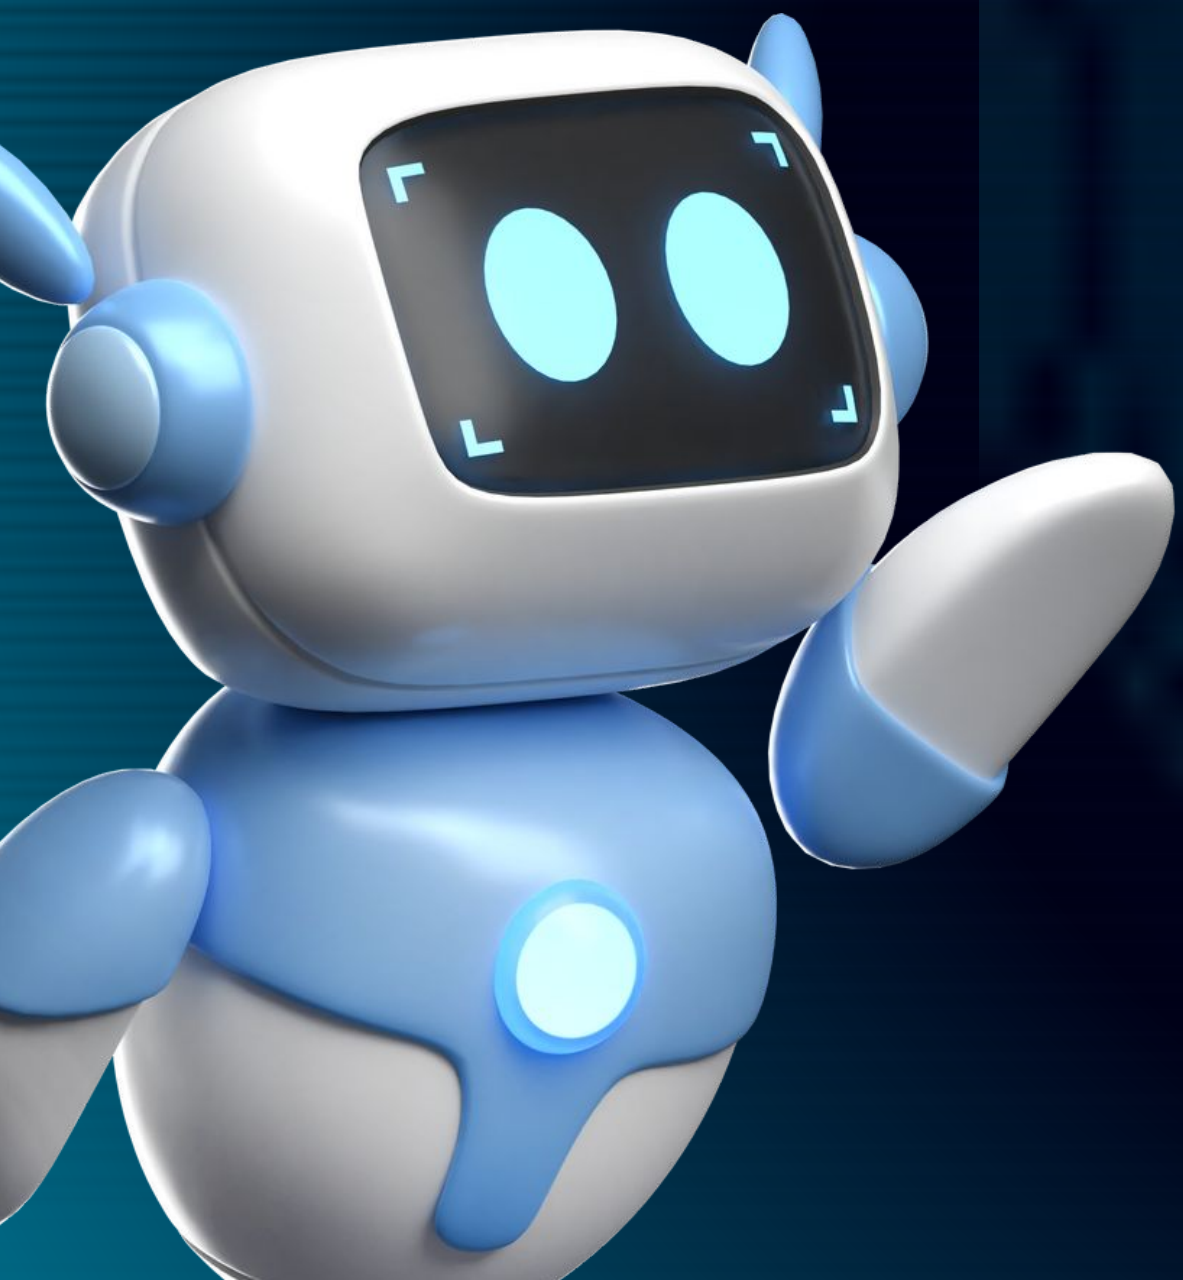

Socrative

Gradescope

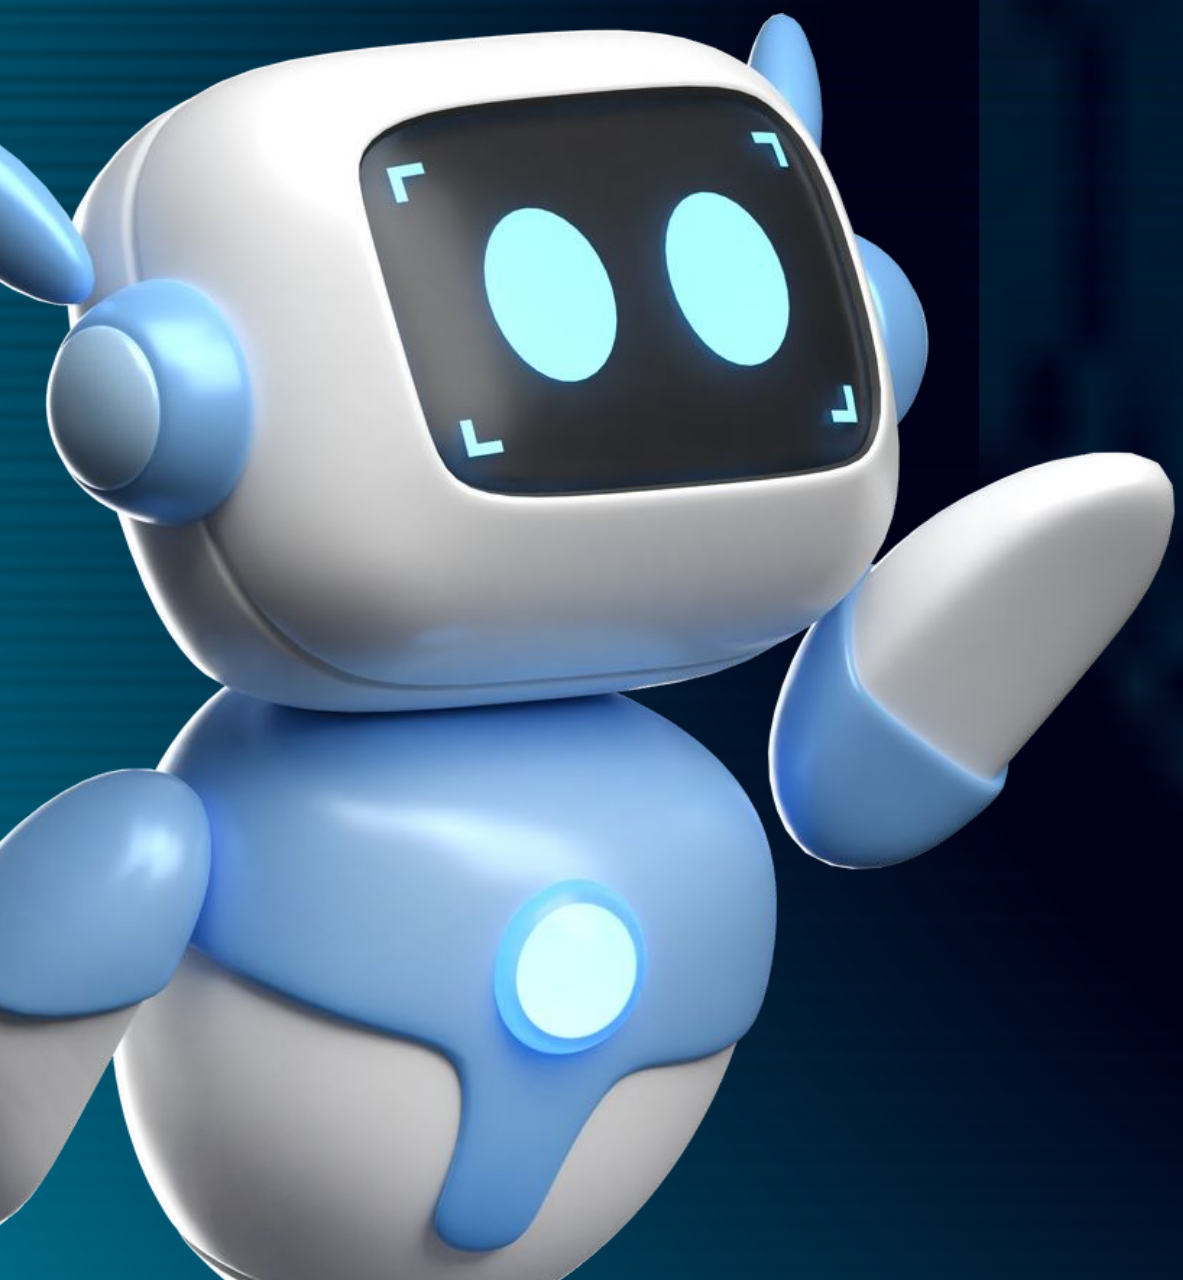

Shazam

Splitwise

AI should
complement
teaching...

not replace it entirely

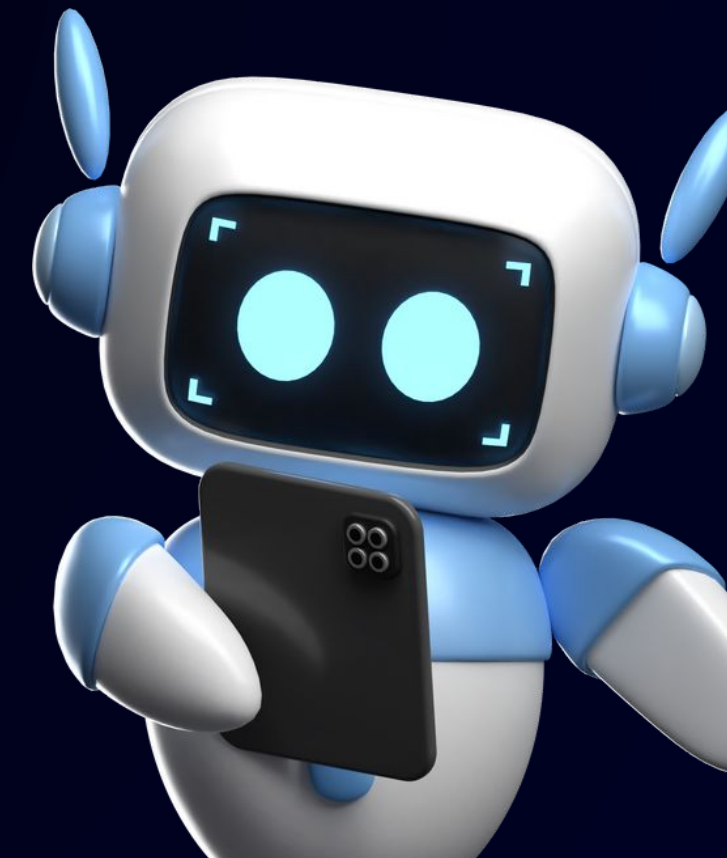

It is important to choose AI tools that align with the specific needs.

5 What AI apps etc are we using and how can they help?

Ok. You've Listened to me enough. Now let's MINGLE!
Talk to those around you where are they in their AI Journey? What have they used? How useful did they find it?

There's chocolate for the first person to get 3 different AI apps etc we are using and explain their uses!
